

#### ABSTRACT OF THE DISCLOSURE

A ski lift blanket that covers a skier during the ride on the chair lift to keep the skier warm. The blanket has a face shield or high collar to keep the face warm. The blanket can be fastened around the waist and deployed by the skier during the ride up. The blanket has two pockets that allow the skier to wrap the blanket around them even while their hands are in gloves. Before exiting the chair lift, the skier can roll up the blanket and secure it with straps fastened by hook and loop fasteners.
